

While you wait

Practice trainer

170 practice questions for Architect: Foundations.

Open `trainer/index.html` from the repository. It runs offline in any browser. Written by me, not exam content.

One question before we start

Does your company belong to the Claude Partner Network?

It decides whether you can sit the exams at all. If you do not know, that is the first thing to find out.

Everything from today

Every fact with its source, the preparation links, and a practice trainer with 170 questions.

No laptop needed. Scan the code if you want to bookmark the resources as we go.

Claude Certification Programme for Partners

Four exams, one partner network, and how to prepare

Dr. Florian Steiner

Claude Community Ambassador Munich

Wednesday, 23 September 2026 · 15:00 to 16:00 · Room 4

WHO IS TALKING

Florian Steiner

Forward deployed engineering and AI consulting. I build with Claude Code inside mid-sized companies, and I teach it.

- **Ph.D. in Business Administration, LMU Munich.** Product lead for start-ups and scale-ups
- **Vodafone Ventures, Telefónica Strategy,** and co-founder of Yasuu, a venture-backed start-up
- **Today:** produktentdecker.com. Claude Certified Architect (Foundations and Professional) and Associate, and Claude Community Ambassador in Munich
- **Everything from this hour is in one public repository:** the facts with sources, the links, and the practice trainer

All three on Credly

Three questions to you

- 1 Who works at a Claude Partner Network organisation? And who does not know?
- 2 Who has already taken one of the four exams?
- 3 Who plans to take one before the end of the year?

The first answer decides everything else. The exams are open only to people at partner organisations. We come back to that at 15:15.

THE FOUR CERTIFICATIONS

Four exams, three of them count

CERTIFICATION	CODE	ITEMS	FEE	COUNTS TOWARD PARTNER TIER
Associate: Foundations	CCA0-F	60	99 USD	No
Developer: Foundations	CCDV-F	53	125 USD	Yes
Architect: Foundations	CCAR-F	60	125 USD	Yes
Architect: Professional	CCAR-P	63	175 USD	Yes

All four: 120 minutes, passing score 720 on a scale of 100 to 1,000. Architect: Foundations draws its 60 items from 4 of 6 published scenarios.

THE FOUR CERTIFICATIONS

Which one is yours

Associate

Consultants, sellers and delivery leads who steer customers to the right use cases.

Does not count toward the tier

Developer

Engineers building with the Claude API, Claude Code and MCP, up to agents in production.

Architect: Foundations

People who design Claude solutions end to end: platform, agent architecture, evaluation, cost, safety.

Architect: Professional

The next level after Foundations, for advanced architects and enterprise engagements.

Start at Foundations. Only Architect has a Professional level today.

THE PARTNER NETWORK PATH

Only people at partner organisations can sit the exams.

Registration needs a company email on a recognised domain. Personal addresses do not work.

- 1 Your company is a partner.** Ask your Academy admin to add you, then register.
- 2 It is not yet.** It joins first. Membership is free for any organisation that brings Claude to market.
- 3 You work on your own.** No separate path is described. Ask through the partner application.

THE PARTNER NETWORK PATH

Four tiers, counted in certified people

TIER	CERTIFIED PRACTITIONERS	JOINT CUSTOMERS IN PRODUCTION	PUBLIC CUSTOMER STORIES
Registered	commitment to 10	not specified	not specified
Select	10 or more	2 or more	1 or more
Preferred	100 or more	15 or more	3 or more
Global Premier	1,000 or more	100 or more, in 3 regions	15 or more

Next tier review: 1 October 2026. A certified person counts only if they used Claude in the last 90 days. Associate does not count.

SITTING THE EXAM

What the day looks like

Where	Pearson VUE: online with a proctor, or at a test centre
How long	120 minutes of exam time, about 135 minutes in the seat
Format	Multiple choice and multiple response. Each item says how many answers it wants
Language	English only. Browser translation is not allowed
Pass	720 on a scale of 100 to 1,000

SITTING THE EXAM

Money, retakes, renewal

Discount	Registered pays full price. Select, Preferred and Global Premier get 50 percent off. Global Premier: free until 31 December 2026
Retakes	Up to 4 attempts in 12 months. Wait 14, then 30, then 90 days. Every retake costs the full fee
Validity	12 months. Renew before it lapses with a free assessment, no proctor
New	Certificates earned before 30 June 2026 were extended from 6 to 12 months
Reschedule	At least 48 hours ahead. A no-show loses the fee

Two official sample questions

Straight from the exam guide, on screen. They are not copied into slides or handouts.

- 1 I read the scenario, the question and the four options.
- 2 **Hands up** for the option you would pick.
- 3 Then the official explanation from the guide.

Watch the pattern: a scenario first, one question, four options, and two of them look right.

Three practice questions

From the practice trainer in the repository. Written by me, close in shape to the official ones. **Not exam content.**

- 1 Same drill: the question, hands up, then the explanation.
- 2 Three questions in a fixed order, from two of the exam domains.

Try it tonight: open `trainer/index.html` from the repository. It runs offline in any browser.

What the exam rewards

Code, not prompt

A rule that must always hold goes into code or a hook, not into the prompt.

Structured errors

Tell the coordinator what failed and why, instead of retrying blindly.

Least privilege

A subagent gets the tools its task needs, and nothing more.

Avoid anything sold as real exam questions. It breaks the exam terms and puts your certificate at risk.

HOW TO PREPARE

Four steps, in this order

- 1** **Read the exam guide first.** Domains, weighting, and the out-of-scope list.
- 2** **Take the free learning path** on the Partner Academy: agent skills, the Claude API, MCP, Claude Code in action.
- 3** **Build something real.** Every question starts from a scenario.
- 4** **Practise last:** the trainer and third-party mock exams. Not official, not reviewed.

There is no official practice exam since the move to Pearson. The sample questions in the guide replace it.

HOW I PREPARED

My own log, not a recipe

What worked

- **Drills per domain.** Mixed scores went from 64 to 85 percent in two days, once I read the concept behind each miss.
- **Concept before question.** Context management: 0 of 5 before reading up, 5 of 5 after.
- **One full mock exam.** 52 of 60 in 64 minutes, a third-party test with 60 questions and 2 hours.

What tripped me up

- **Tool design and MCP** stayed my weakest domain in every drill.
- **The loop ends on end_turn.** An iteration cap is a cost backstop, not the exit.
- **Prevent, do not repair.** Structured outputs instead of a retry loop for schema errors.

QUESTIONS, AND TAKE IT HOME
